Stephenville, Texas

Last Monday's mail brought a letter which contained the following questions, which was returned with the following answers:

1. How long does it take a pecan tree to bear after it is bought from a nursery, when cared for on good soil?
Ans. Four years.

2. How long before they pay commercially?
Ans. Seven years.

3. When should a pecan tree produce 100 or more pounds of nuts?
Ans. When fifteen years old.

4. How many trees should be planted per acre?
Ans. From twelve to twenty, depending on the soil.

5. What is the result of cutting the tap root?
Ans. It makes from one to six tap roots.

6. How long does a pecan tree live?
Ans. From two hundred to a thousand years.

7. What size of trees are best to plant?
Ans. Pecan trees from 3 to 8 feet, transplant and grow best.

8. Will there likely be an overproduction of pecans?
Ans. Not in our lifetime.

9. Is it better to buy trees or plant nuts?
Ans. It is quicker and more satisfactory to buy trees.

10. Should pecan trees be cultivated?
Ans. Pecan trees respond to fertilization, cultivation and care like all other fruit trees.

11. What kind of soil is best for pecans?
Ans. Soil that is fertile, well drained, retains moisture and has soft subsoil is best. They will grow most anywhere.

12. Is it best to plant more than one variety?
Ans. Two or more varieties should be planted to insure pollination.

13. What is a good bearing pecan orchard worth?
Ans. A good pecan orchard, fifteen years old, sells from \$1,000 per acre and more. It will increase in value as it grows older.

14. Will a fine pecan come true to seed if the nut is planted?
Ans. No. The seedling tree has to be budded or grafted to insure a fine papershell pecan.

15. Where is the best place to buy pecan trees?
Ans. One good place to buy pecan trees is from Wolfe's Pecan Nursery, at Stephenville. These people are honest and guarantee their trees to be true to name, free from disease and to give satisfaction on delivery or your money back. They use a special seed which is hardy and fast growing. Their trees have good lateral roots, from 90 to 100 live and grow. Each tree is up to size in grade. They are dug fresh, roots puddled in mud, and packed carefully. In fact, not having any other business except the pecan business they are specialists in their line, and selling direct through their catalogue they are able to sell cheaper. They send full directions for planting with their trees.

The demand for our trees far exceed the supply. It is imperative that you send in your order early. Use our order sheet.

TERMS: 25% deposit with order, balance before shipping or C. O. D. Order early to get what you want.
